Unknown Ancient History Of Antarctica And It's Lost ...

Off the southern shore of Okinawa, Japan, under 20 to 100 feet of water lie enigmatic structures that may have been built by some ancient, “lost civilization”. Skeptics say the large, tiered formations are probably natural in origin (which seems crazy looking at the pictures) .

Top 10 Mysteries of Ancient or Lost Civilizations - Listverse

Peter Bogucki’s The Barbarians: Lost Civilizations is a beautifully bound and illustrated work of approachable scholarship, written in a somewhat dry manner (at least given the subject matter) but ably covering the most significant events in early European history from a learned and always interesting perspective. Bogucki details how the Barbarians played a role equal to that of the Classical civilizations in the creation of European culture, and their legacy, while necessarily much harder ...

Unearthing the scientific evidence, myths, and legends of ancient civilization! The reminders of the Ancients are everywhere. They are saved in remnants in archaeology. They are found in reminiscences in mythology. They are recorded in books, story, song, and stone. Who were these people, aliens, man-or-myths? Do we still see their influences today? What remains of these inhabitants of the jungles, lost cities, and dwellings underground, underwater and beyond? How did they rise? Why did they fall? Will they rise again? From pyramids and underground bunkers to watery graves and ancient astronauts, Lost Civilizations: The Secret Histories and Suppressed Technologies of the Ancients examines the archaeological evidence and the traces left behind by more than 70 ancient civilizations, including ... Atlantis Gobekli Tepe Anasazi disappearance in the American Southwest Nazca Lines of Peru Turkey's Catalhuyuk Denisovan Ancestors departure Amazon Cities in the Jungle Neanderthal Ancestors extinction The Eden Stories of Theoretical Physics Underground Cities of the Grand Canyon And many more! From ancient Egypt, middle America, and the Nubian Desert to the frozen Antarctica, underwater ruins of Asia, and clues of visits by ancient aliens, Lost Civilizations explores the unanswered questions about the true origins of man. Might there have been advanced civilizations long before the days of ancient Egypt and Mesopotamia? What do 3D imaging and new underwater mapping technology reveal? What do prehistoric artifacts, architecture, carvings, maps, and monoliths tell us? Were rising waters, erupting volcanoes, catastrophic solar flares, comet or asteroid fragments or some other unimaginable cataclysmic disasters the death of these advanced civilizations? Touring the world and reviewing the scientific evidence, this fascinating book ties together historical events in one part of the world that produced actual effects in others. Uncovering hidden and suppressed pasts of technologically and culturally advanced ancient civilizations, it looks at how modern civilization compares and contrasts to those who have gone before. It will leave you with the sense that what has happened to past advanced civilizations might very well be happening again in our own time! With more than 120 photos and graphics, it is richly illustrated. Its helpful bibliography and extensive index add to its usefulness.

Are history books giving us the whole story? Or is civilization far more complex and far older than we have been taught? Our school textbooks barely mention the 6,000-year-old Sumerian civilization, yet the latest archaeological findings at sites such as Jericho and, most recently, Gobekli Tepe in Turkey have been dated to 10,000 BC. Civilization goes back at least another 10,000 years, if we are willing to believe what our ancestors themselves claimed. The Lost Civilization Enigma reveals the truth about: Lost magnitudes to known cultures, such as the Bosnian Pyramids and the civilization of “Old Europe”, The fabled lost “golden” cities of South America and the Amazon, which are slowly being rediscovered; Fascinating examples of lost technology, such as the Antikythera Device; Atlantis and the fact that it was a real civilization. Analyzing the historical and archaeological record, best-selling author Philip Coppens demonstrates that there is substantial evidence that civilization is far older, far more advanced, and far more special than is currently accepted. Clearly, our history books have left out a great deal!

Whether it is Plato's lost city of Atlantis, a technological advanced utopia that sank into the ocean "in a single day and night of misfortune"; the colony of Roanoke, whose early American settlers were swallowed up in the wild forest lands of the unexplored continent, or the Ancient American Explorers, who managed to arrive to the New World 2,000 years before Columbus, the disappearance of these societies is as cryptic as it is implausible. This book will look at cultures of the 10 greatest lost civilizations in history. Some were millenia ahead their neighbors, such as the Indus Valley Civilization, which had better city planning in 3,000 B.C. than any European capital in the 18th century. Others left behind baffling mysteries, such as the Ancient Pueblo Peoples (formerly known as the Anasazi), whose cliff-dwelling houses were so inaccessible that every member of society would have to be an expert-level rock climber. It will also at explanations as to how massive societies that lasted for centuries can disappear without a trace. Did the builders of the pyramids handy craftsmen whose method of transporting massive stones are still unexplainable simply disappear or were they part of an advanced alien race, as conspiracy theorists assert? Was the Kingdom of Akum really the keeper of the Ark of the Covenant, and did this lead to their downfall?

Was there once a civilization more advanced than ours, more technologically sophisticated, and more spiritually aware than our own? For anyone intrigued by these questions, this is the first definitive overview of the theories about the location of lost civilizations like Atlantis, Lemuria, and Mu. Each society is brought vividly back to life by exploring the history of their inhabitants and the mythology that has since grown-up around them. This compendious volume is divided by section to cover all parts of the globe and features lavish reconstructions, maps of possible locations, detailed annotations, with an overview of all the archeological evidence. Beautifully illustrated throughout in full-color, this is a must have for any history or ancient mysteries enthusiast.

Reveals an ancient race of Little People, the catalyst for the emergence of the first known civilizations • Traces the common roots of key words and holy symbols, including the scarlet biretta of Catholic cardinals, back to the Little People • Explains how the mounds of North America and Ireland were not burial sites but the homes of the Little People • Includes the Tutha De Danaan, the Hindu Sri Vede, the dwarf gods of Mexico and Peru, the Menehune of Hawaii, the Nunehi of the Cherokee as well as African Pygmies and the Semang of Malaysia All cultures have stories of the First People, the “Old Ones,” our prehistoric forebears who survived the Great Flood and initiated the first sacred traditions. From the squat “gods” of Mexico and Peru to the fairy kingdom of Europe to the blond pygmies of Madagascar, on every continent of the world they are remembered as masters of stone carving, agriculture, navigation, writing, and shamanic healing—and as a “hobbit” people, no taller than 31/2 feet in height yet perfectly proportioned. Linking the high civilizations of the Pleistocene to the Golden Age of the Great Little People, Susan Martinez reveals how this lost race was forced from their original home on the continent of Pan (Known in myth as Mu or Lemuria) during the Great Flood of global legend. Following the mother language of Pan, Martinez uncovers the original unity of humankind in the common roots of key words and holy symbols, including the scarlet biretta of Catholic cardinals, and shows how the Small Sacred Workers influenced the primitive tribes that they encountered in the post-flood diaspora, leading to the rise of civilization. Examining the North American mound-culture sites, including the diminutive adult remains found there, she explains that these stately mounds were not burial sites but the sanctuaries and homes of the Little People. Drawing on the intriguing worldwide evidence of pygmy tunnels, dwarf villages, elf arrows, and tiny coffins, Martinez reveals the Little People as the real missing link of prehistory, later sanctified and remembered as gods rather than the mortals they were.

An increasing number of historical and archaeological finds made around the world have been classified as out-of-place artifacts (ooparts). They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development; their technological sophistication seems far beyond the capabilities of ancient peoples.Drawing on the literature and art of the Chaldeans, Sumerians, Babylonians and others, Rene Noorbergen's contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own.

Introducing the book that governments and mainstream academia donat want you to see. Evidence of Lost Ancient Civilizations: Case Closed is the ultimate reference guide for anyone interested in learning the true, unfiltered history of ancient civilization and of mankindas earliest origins. This definitive resource guide uniquely presents and explores evidence not included in conventional history or science textbooks. Revealing evidence consisting of compelling eyewitness accounts, media reports, scientific journal articles, as well as indisputable physical evidence, has never been made available to the general public. You will see by the overwhelming shocking evidence and data presented throughout this book it is apparent that modern science and history have been offering a less-than-accurate account of evolution and the origins of mankind on Earth. The basic questions this book attempts to answer are: Where did we come from? What is the true history of mankind? Where will the truth lead us? What humanity may first discover from this explosive ancient evidence may shake the foundations of established world order and religion, and will certainly be difficult to comprehend or rationalize. However, what we may learn from our forgotten past could guide us in determining the direction of our future.

From Roman villas to Hollywood films, ancient Egypt has been a source of fascination and inspiration in many other cultures. But why, exactly, has this been the case? In this book, Christina Riggs examines the history, art, and religion of ancient Egypt to illuminate why it has been so influential throughout the centuries. In doing so, she shows how the ancient past has always been used to serve contemporary purposes. Often characterized as a lost civilization that was discovered by adventurers and archaeologists, Egypt has meant many things to many different people. Ancient Greek and Roman writers admired ancient Egyptian philosophy, and this admiration would influence ideas about Egypt in Renaissance Europe as well as the Arabic-speaking world. By the eighteenth century, secret societies like the Freemasons looked to ancient Egypt as a source of wisdom, but as modern Egypt became the focus of Western military strategy and economic exploitation in the nineteenth and early twentieth centuries, its ancient remains came to be seen as exotic, primitive, or even dangerous, tangled in the politics of racial science and archaeology. The curse of the pharaohs or the seductiveness of Cleopatra were myths that took on new meanings in the colonial era, while ancient Egypt also inspired modernist, anti-colonial movements in the arts, such as in the Harlem Renaissance and Egyptian Pharaonism. Today, ancient Egypt—whether through actual relics or through cultural homage—can be found from museum galleries to tattoo parlors. Riggs helps us understand why this “lost civilization” continues to be a touchpoint for defining—and debating—who we are today.

So many ancient civilizations mysteriously vanished leaving behind only ruins. Uncover why these lost civilizations disappeared and still mystifies us! The world is a mysterious place, and there are whole epochs of history that our modern sensibilities have yet to come to grips with. The ancient philosopher Plato once spoke of an ideal society that met with cataclysmic destruction, on an island called Atlantis. Although long considered fantasy or metaphor, there is reason to believe that Atlantis did indeed exist. There is also reason to believe that there is more to the disappearance of a mysterious group of Native Americans called the Anasazi than meets the eye. These dwellers of the Four Corners region of the American southwest built impressive works of architecture carved right out of rock walls, and even built roads between their massive dwellings. Yet one day they seemingly picked up and left for good. This book explores what might be behind the mysteries of these lost civilizations. Here you will find a full history of these ancient peoples, places, and cultures, and a complete telling of the enigmas that they left behind. Because with an open mind and a clear focus, there just might be something truly incredible for us to discover. Scroll back up and click the BUY NOW button at the top right side of this page to order your copy now!

Thinkers at the forefront in alternative theories on history, the origins of civilization, technology, and consciousness • With contributions by Graham Hancock, Robert Bauval, Mark Booth, Richard Hoagland, Robert Schoch, John Anthony West, and others • Topics range from quantum philosophy and paranormal phenomena to the secret history of NASA, instant polar shifts, and ancient Martian civilizations • Explores where our present time fits into the cycle of human existence A revolution of thought is under way in our world, fostered by decades of research and well-documented evidence by alternative theory pioneers such as Graham Hancock, John Anthony West, Robert Bauval, and Robert Schoch. These provocative, cutting-edge scholars now represent a direct challenge to the academic establishment as the paradigms of science and history shift and their ideas gain acceptance. Representing the latest, often controversial findings in scientific and historical research, this anthology of essays commissioned by Graham Hancock, bestselling author of Fingerprints of the Gods, covers the forefront in alternative theories on history, the origins of civilization, technology, and consciousness with topics ranging from quantum philosophy and paranormal phenomena to the ancient use of electromagnetism, the effect of cosmic rays on human evolution, and NASA's cover-up of ancient Martian civilizations. Recognizing that many recent discoveries are actually rediscoveries of lost knowledge from past civilizations, these authors seek to understand where, within the bigger picture of human knowledge, our present time fits into the cycle of human existence.
